GitHub AI Activation Series

Increasing utilization and adoption

Eric Laan & Leandro Lopez

← → or click arrows to navigate

Table of Contents

1 **Opportunity**
The revenue landscape — seats, penetration, and ACR expansion across accounts.

2 **Intent**
Why this series exists — driving consumption, managing inquiries, building community.

3 **Approach**
The engagement model, cadence, and how we'll measure progress together.

4 **Presenters & Topics**
Who's presenting what — deep dives, demos, and hands-on sessions.

5 **Governance**
Lightweight governance with clear owners and industry pool leads.

01 — Pilot Opportunity — 5 Strategic Customers

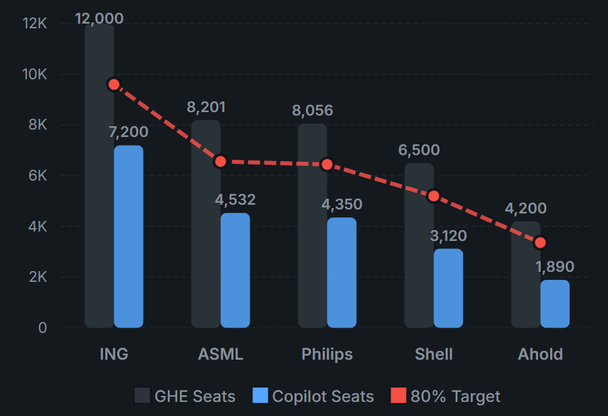
LIVE DASHBOARD

↔ Horizontal Expansion | ↕ Vertical Expansion | ⊕ Total Opportunity

TOTAL GHE SEATS	GHCP SEATS ACTIVE	CURRENT ACR / MO	90% TARGET ACR / MO
38,957	21,092	$400.7K	$666.2K
Across 5 enterprise accounts	54% avg penetration	$154.4K gap to 75% target	+66% expansion possible

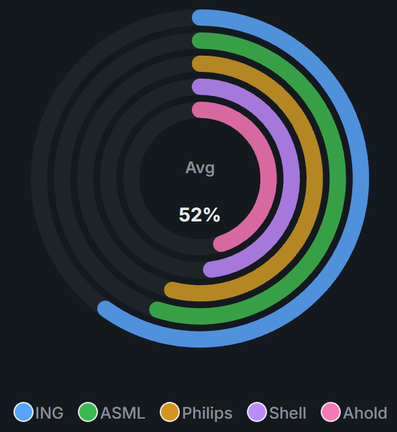
GHE vs Copilot Seats by Customer

Total GHE seats (blue) against active Copilot seats (green) — gap = expansion opportunity



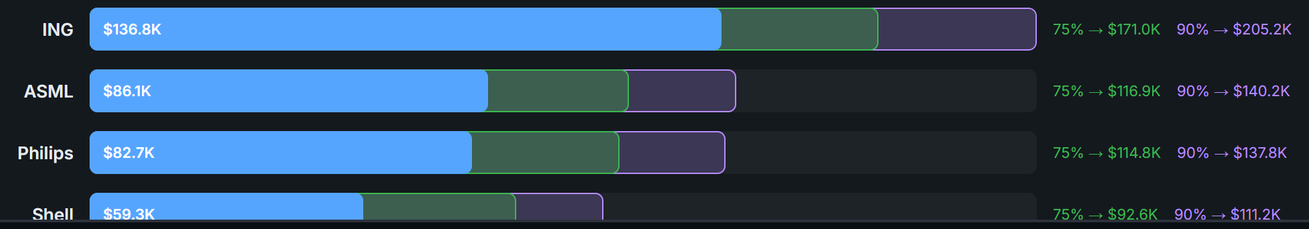
Copilot Penetration Rate

Current adoption % vs 75% and 90% stretch targets



Monthly ACR Expansion — Actual → 75% → 90%

Each bar shows current ACR (blue), the 75% target zone (green), and the 90% stretch (purple)



02 — Intent

Drive AI adoption through structured engagement, measurable outcomes, and community.

Teach the New Dev Skill

Spec-driven development & agentic engineering — devs must learn to **lead autonomous agent fleets**. The skill that turns every license into real AI consumption.

3.2× REVENUE MULTIPLIER TARGET

Structure Customer Engagement

Replace ad-hoc requests with a **recurring expert-led series** — Microsoft + GitHub engineers co-delivering.

400+ PARTICIPANTS PER SESSION

Build Community Flywheel

Customer community centered on GitHub AI — peer learning drives adoption faster than any sales motion.

5 PILOT ACCOUNTS SEEDING IT

1 Segment
High-activity accounts get dedicated sessions; others join shared cohorts.

2 Pilot
5 accounts — ING lead + 4 strategic — with STU, CSU & account accountability.

3 Measure
3-metric scorecard per customer. Lightweight, consistent, actionable.

SUCCESS SCORECARD

Active Copilot Users	ADOPTION
Usage Delta (pre/post)	CONSUMPTION
Attendance → Replays	REACH

03 — Approach

Bi-weekly, demo-first expert series — **MSFT + GitHub deliver content**, customers drive internal engagement.

Cadence

2×	1hr	200+
PER MONTH	PER SESSION	MIN ATTENDEES

- Specific topic + live demo each session — **no slide decks**
- Customer manages audience & promotion; **MS/GH provide speakers & content**
- Rotating speakers: GitHub SEs/CSAs, Microsoft GBBs, Dev Advocates

Format

- Customer champion opens & provides internal context
- Skills development tie-in: ESI program + Microsoft Learn
- Non-strategic accounts join shared webinar cohorts

Session Agenda

30–40 MIN

Hands-on Demo
GitHub/Microsoft live demo on focused topic — drive feature adoption
GITHUB / MICROSOFT

10 MIN

Live Q&A
Open floor — adoption blockers, roadmap, best practices
GITHUB / MICROSOFT + CUSTOMER

10–20 MIN

Customer Engineer Demo
Internal success story — create FOMO & spark replication
CUSTOMER

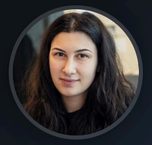
GitHub / MS · Joint · Customer-led

04 — Presenters & Topics

✨ EXPERT LINEUP

🚀 **These are not typical presenters.** They already live in the AI-first coding world your teams are moving toward. Every speaker was chosen because they are **ahead of the curve** — building, shipping, and scaling with Copilot daily. Their job on this stage: make that future feel **achievable** for your engineers, starting today.

GitHub Sales Engineers, Microsoft Cloud Solution Architects, Developer Advocates, and core Engineering leaders — each one bringing live demos and battle-tested patterns that turn inspiration into adoption.



Simona Toader
Global Black Belt Developer, Microsoft

Copilot in the IDE — Real-time code suggestions, chat workflows, and maximizing daily developer productivity.

GITHUB

Ali Soliman
Applied AI at Microsoft

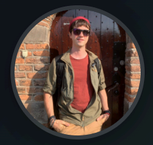
Copilot for Security — AI-powered vulnerability detection, code scanning, and secure development workflows with GHAS.

GITHUB

Pascal van der Heiden
Sr. Solution Engineer AI Apps, GitHub

Spec Driven Development — From requirements to code using Copilot Workspace and spec-first engineering practices.

GITHUB



Anton Sizikov
Sr. Solution Engineer, GitHub

Copilot Agent Mode — Autonomous multi-file editing, agentic workflows, and next-gen AI pair programming.

GITHUB

Gerald Versluis
Sr. Software Engineer, Microsoft CoreAI

.NET MAUI + Agent Fleet — Building cross-platform apps with Copilot and managing a fleet of agents via Copilot CLI.

MICROSOFT ENGINEERING

Eduard
Software Engineer, Microsoft CoreAI

Building Agents with Agents — The engineer behind MAF shows how he uses Copilot to build the very framework that powers AI agents.

MICROSOFT ENGINEERING

FL

Floris
Solution Engineer Software, GitHub

Enterprise DevSecOps — Integrating Copilot into CI/CD pipelines, Azure DevOps, and platform engineering.

MICROSOFT

KA

Karol
Solution Engineer Software, GitHub

Copilot for Infrastructure — Infrastructure-as-Code generation, Bicep/Terraform workflows, and cloud automation.

MICROSOFT

EM

Emile
Solution Engineer Software, GitHub

Live Coding Masterclass — Building full-stack apps from scratch in 60 min using Copilot Chat and Agent Mode.

MICROSOFT

SO

Soham
Developer Advocate, Microsoft

Copilot for Data & AI — Python notebooks, data pipelines, and ML model development accelerated by Copilot.

MICROSOFT

05 — Governance

A lightweight governance with clear owners ensures a smooth and scalable program execution.

ROLE	ASSIGNEE
Program Owner	Leandro Lopez
GitHub Program Sponsor	*TBD*
CSU Program Sponsor	*TBD*
GitHub Speaker Pool Lead	*TBD*
Microsoft Speaker Pool Lead	*TBD*
Industry Pool Lead	FSI · RETAIL · MANUFACTURING · PUBLIC

Thank You

Let’s accelerate AI adoption — together.
